

Mochrum Fell Wind Farm

FIGURE 1
 Draft Recreational Enhancement Plan

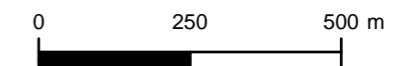

KEY

- ▭ Site Boundary
- Turbine Locations
- - - Consented Access Tracks
- Core Path
- Proposed Walking/Cycling Path
- Pond
- ✱ Vantage Point
- ? Information/Interpretation Board
- ☺ Picnic Area

The recreational enhancement plan aims to improve the recreational benefits at Mochrum Fell by increasing walking and cycling accessibility and adding points of interest. New signage, way markers and interpretation would be provided from existing Core Paths to aid navigation.

The spatial experience would be achieved by adding paths to vantage points to emphasise the external views to the wider landscape at the summit of Mochrum Fell and the nearby cairn. These may also incorporate information or interpretation boards relating to both the wind farm and surrounding landscape. These would inform visitors about the historical, cultural and environmental elements of the site.

There is potential to add further elements throughout the site to further enhance the recreational experience. These include a new pond/wetland, picnic area and possibly artworks or sculpture commissioned through a local artist.
